

Azure Storage

The queries below allow you to query various diagnostic and metric data for Azure Storage.

Optimal rendering options are also included below each query.

List Last Regeneration of Account Keys

List the last attempt and status of changing account keys (within the past 3 days) for the storage accounts.

```
AzureActivity
| where OperationName == "Regenerate Storage Account Keys" and
ActivityStatus != "Started"
| where TimeGenerated > ago(3d)
| summarize any(TimeGenerated) by Resource, ActivityStatus
| project-rename DateTimeStamp = any_TimeGenerated, Resource, ActivityStatus
```

#table
